This is a double edge sword. I don't want to get into the habit of reviewing and "approving" reports from outside agencies but in this case it might be wise. I recommend responding we would be happy to review the report for accuracy. Once we get the report we can determine rather quickly as to who needs to be included in the review and how much time it will require. Let's agree to give it a review and we can go from there. One big point I want to make and that is we do not want to use words like "approve" or anything similar as we don't want the report to have the DNREC seal of approval. We want to help ensure accuracy but at the end of the day it is their report and they are responsible for accuracy (if that makes sense).

Rob

As far as reading her report, I'm certainly willing to do that, but it wouldn't be on the top of my yahoooo list! Up to you on how we should respond. M

Hi Molly—thanks so much for doing this. I've cc'd Rob Underwood, who I had the original conversation with, and will get back to you both in a few days if I have questions. If I may ask, would you be willing to look over our completed report to make sure we haven't made any mistakes, or omitted anything important? We like to do this so our published work is as accurate as possible. Thanks again,

Anne

Ms. Riddle,

In response to your May 22, 2012, request for water quality trading program information for Vlasic Foods and the Town of Lewes and their NPDES permits, the Surface Water Discharges Section (SWDS), Division of Water, Department of Natural Resources and Environmental Control, responds:

Please see the attached NPDES permits, fact sheets and a PowerPoint presentation about nutrient trading. Please let me know if you have any questions.

Just an FYI, the SWDS generally includes programs related to Concentrated Animal Feed Operations, Biosolids, Municipal Separated Storm Sewer Systems, Industrial Storm Water, National Pollutant Discharge Elimination System, Pesticide, and Wastewater Construction permits.
